

STUDIO SERIES MASTERS

This turn-key, all inclusive virtual golf studio is ideal for club fitting, instruction environments and home use.

The Masters Studio package has everything you need to set up a fully functional golf studio from scratch. The Masters comes with two units so there's never a space issue dealing with both righties and lefties. The touch screen monitor makes the interface with the P3ProSwing software easy as pie, and the lightning fast gaming grade computer processes the graphics beautifully. Masters comes integrated with Video Capture software too, so you can take footage of your swing and deconstruct your body movements with line drawings, or the single frame advance and slider bar controls can be used to fast forward and rewind to a specific segment of your swing.

The Masters Package Includes:

2 Grass Top Units
